

FOR IMMEDIATE RELEASE

WESTON FOREST RECOGNIZED FOR ENERGY INNOVATION

Mississauga, Ontario – September 22, 2016. Weston Forest is pleased to be recognized at the *Energy into Action* conference with an Energy Innovation Award for the Industrial category between 251-999 KW. This is the first year these acknowledgments have been awarded. Southern Ontario utilities, along with the Independent Electricity System Operator (IESO), nominated 53 companies for consideration by a panel of judges to determine the winners.

Weston Forest has worked very closely with Enersource to identify areas of opportunity in efficiencies and energy conservation. The result is a reduction in our annual consumption of electricity by 482,362 KWH, and we achieved this while increasing production in the facility by close to 20%.

Steve Rhone, President of Weston Forest, explains, “We are proud of our commitment to both the environment and our business. We strongly believe in our company’s goal and motto, ‘YOU’LL LOVE DOING BUSINESS WITH US’, and that includes being a good corporate citizen.”

Weston Forest is one of North America’s leading distributors and remanufacturers of softwood & hardwood lumber and specialty panel products. Weston’s different business units serve the industrial crating and packaging sectors, provide specialty products to the construction and infrastructure sectors, and manufacture and distribute a wide variety of products to Lumber and Building Material dealers.
